Making a Property a Home

The luxurious Nova Development is located near Victoria Station, a prime Central London location. The apartments have a fresh, modern design and boast floor to ceiling windows which give them a light, airy and spacious feel.

Subtle automation adds an extra touch of luxury and convenience, by offering the perfect ambience in each room at the touch of a button. Wall mounted ICON control panels were tailored specifically for this apartment, to include extra keys to manage the curtains as well as the lights and heating.

A 55" Samsung UHD 4K Smart LED TV was wall mounted and connected to Sky + HD, Apple TV and a Sonos sound bar to provide superb entertainment.

Internet access is also important, and connectivity was enhanced with a Draytek POE Injector and Cisco wireless access point.

Division: Residential
Location: London
Project Duration: 2 weeks
Residential Director: Clive Mosby

Project Features

- 55" Samsung UHD 4K Smart LED TV
- Sonos Playbar
- Apple TV 32GB
