

JOB DESCRIPTION

Systems Programmer

Job Title:	Systems Programmer
Salary:	Negotiable
Type:	Full-Time, Permanent
Division:	Central Functions
Location:	High Wycombe with travel to locations across London and the UK
Report to:	Operations Manager
Benefits:	Private Health Care, Laptop and Smartphone

Main Purpose of the Role

The Systems Programmer role is a great opportunity if you like to work in a dynamic environment with a high degree of autonomy and are looking for long term career prospects. Reporting to the Operations Manager you will be part of a friendly supportive team, working both on-site and offsite in beautiful luxurious prime residential developments and state of the art commercial offices. You will need to liaise directly with other sub-contractors, end users, Smartcomm Sales Consultants, Design Team and Project Managers to deliver the program to the client's satisfaction. While the majority of the onsite implementation work will be in London and the South East, there can be the occasional requirement to work away from home. The offsite preparation work can be at our High Wycombe office and on a work from home basis. A professional manner will be expected at all times while dealing with colleagues and clients whilst working to complete the installation.

Main Responsibilities

- 1) Create programs and modules in various bespoke applications e.g. Crestron and AMX, to the project specification
- 2) Design and program Touch Panel and control device layouts
- 3) Work on programme development
- 4) Provide technical support to junior programmers and other engineers
- 5) Attend site to install programs and test and commission systems
- 6) Ensure good communication with the Project Manager to deliver all parts of the project at the required deadlines.
- 7) Maintain and enhance your knowledge of AV equipment changes especially in commonly used equipment i.e. Crestron processors
- 8) Ensure that project programmes and files are backed up sufficiently during the project and archived in the proper Smartcomm server / cloud location at the end of a project
- 9) Maintain a detailed forward works and records calendar, and other required administration.
- 10) Ensure that all company policies and procedures are followed at all times.
- 11) Maintain high standard of appearance and wear safety clothing provided.
- 12) Carry out any other duties as required by your line manager

Qualification, Experience, Key Skills & Achievements
