integrating technology with vision

Park House

Completed in November 2012, Park House is the largest development on Oxford Street in 40 years. With eight floors encased in a dramatic glass exterior, the highly anticipated building provides over 160,000 sq ft of open office space, eleven retail units with exposure to the estimated 200 million people* that visit Oxford Street each year and 39 affluent residential apartments featuring their own entrance on North Row.

- Integrated Crestron Control system
- Video Intercom
- Crestron DALI lighting system
- Television Distribution with Satellite Television feeds for digital TV, DAB & FM radio
- Aquavision screens & waterproof remotes

Smartcomm have supplied these Mayfair-address homes with stunning state-of-the-art technology, including integration of video, audio, lighting, HVAC, blind control and video intercom.
