

CASE STUDY

RESIDENTIAL

City chic life enhancing Audio Visual solutions for added luxury. Intuitive. Powerful. Stylish.

## Wood Wharf

Luxurious City Chic

Wood Wharf is a 23 acre site on the Canary Wharf estate, designed to blend living, working and leisure facilities in a waterside community. One Park Drive, towering 57 levels high, is the signature building of Wood Wharf.

Residents enjoy premium amenities at One Park Drive. The amenity areas are designed by GA Design and spread across the ground and first floors. The reception, 24 hour hotel-style concierge, lounge, library and luxurious cinema are all on the ground floor. The first floor houses the exclusive Health Club and Spa, which features a 20m swimming pool, steam room, sauna and Gym. The Gym is comprised of a weightlifting area, studio space and training room.

Canary Wharf Group selected Smartcomm to deliver the Audio Visual, lighting and control solutions for these sumptuous amenity spaces. As well as functionality, robustness and usability, the technology had to complement the design of each designated amenity area. The project was delivered on time and within budget.

**Division:**  
Residential & Hospitality

**Project Location:**  
Central London

**Project Duration:**  
26 months

**Project Value:**  
NDA

**Project Lead:**  
Guy Murray, Home Automation Specialist

### the tech

- Sony Native 4K UHD Projector
- 140" Lateral E-Mask Projection Screen by Screen Research
- 7.4.2 Dolby Atmos Surround Sound
- Bowers and Wilkins in ceiling and in wall speakers
- Crestron Control Touch panels and Multi-Room Audio
- 65" and 75" Samsung Smart TVs
- Sonance Extreme Series 6.5" speakers

# key features

1. Sony Native 4K UHD Projector
2. 140" Lateral E-Mask Projection Screen by Screen Research
3. 7.4.2 Dolby Atmos Surround Sound via Bowers and Wilkins in ceiling and in wall speakers
4. Crestron control touch panel
5. Cupboard housing the sources

## Stylish **Luxury**

The private cinema offers sumptuous seating for 18 guests. The impressive 140" Lateral E-Mask Projection screen by Screen Research perfectly complements the Native 4K Sony Projector, capable of delivering images over four times the quality of Full HD. Provides an immersive cinematic experience, perfect for movies, live sports and online gaming. The bespoke lighting scenes are tailored to create the perfect atmosphere. All aspects of the room are easily and intuitively controlled through the Crestron system using the custom-made user interface and the app downloaded on an iPad Mini.

## Sound **Power**

This luxury cinema also features a powerful 7.4.2 Dolby Atmos surround sound system. This is delivered via Bowers and Wilkins speakers and subwoofers hidden in wall and in ceiling, with a Denon amplifier. Sources, including a BluRay player and Sony Playstation, are housed in the discreet cupboard to the left of the projection screen.

## Perfect **Ambience**

The Crestron touch panels control the lights, sound and entertainment easily and intuitively for guests and staff alike.

Crestron Sonnex Multi-Room audio distribution ensures each area has the perfect music. This improves the ambience and helps to give a seamless and unified feel to the various amenity spaces. While most areas feature Bowers and Wilkins speakers and subwoofers, the sauna and steam room feature Sonance Extreme Series 6.5" stereo speakers.
