

Environmental Policy Statement

Smartcomm Ltd is committed to working to minimise the environmental impact of our audio-visual installation services and support operations. We are also committed to ensuring that we are continually improving our environmental performance.

The company is committed to achieving high operational and environmental management standards on behalf of its clients. To achieve the necessary high standards of environmental awareness,

The company will encourage greater awareness and understanding and effective management of environmental issues. The company will work to enhance the quality of the environment by encouraging its employees to use current knowledge and experience to anticipate environmental problems that could arise from their professional activities.

1

Waste Management and Minimisation

- The company will review the way in which materials are designed, procured, and supplied so that the amount of waste generated on construction sites can be minimised, where possible.
- Where practicable, consideration will be given to material re-use, recycling, or recovery before disposal options are explored.

Energy Conservation

- The company will where possible encourage the use of sustainable energy resources and seek opportunities to improve energy efficiency.

Environmental Compliance

- The company will comply with their statutory and environmental obligations and in all instances will act in a professional and diligent manner.
- The company will ensure, where practicable, that business partners and sub- contractors have appropriate environmental policies and take steps to implement them.

Sustainable use of Resources

- The company will work towards improving equipment resource efficiency, by promoting the economic use of equipment & materials and methods so that waste is minimised.
- The company will encourage the sustainable use and management of water resources through incorporation of water efficiency measures and the use of sustainable urban drainage systems, where appropriate.

Smartcomm will also:

- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling and sustainability issues both internally and amongst its customers and suppliers.

- Dispose of our waste in a considerate manner and maximising the amount of material we are able to re-cycle.
- Communicate the importance of environmental issues to our people.
- Review and revise this policy annually or as business circumstances change.

The overall objective of the Environmental Policy is to promote a company culture which actively commits resources to the management of environmental issues at a corporate and individual level and demonstrate a high standard of commitment to the environment and environmental issues.

The Managing Director will ensure that this policy is understood by all members of staff and those working with customers on project sites and within our own premises.

Signed:

Steven Worrell
